47160 Puchong, Selangor.

Overview

The Dude network monitor is a new application by MikroTik which can dramatically improve the way you manage your network environment. It will automatically scan all devices within specified subnets, draw and layout a map of your networks, monitor services of your devices and alert you in case some service has problems.

What will be covered?

- Understand The Dude server and client requirement
- Understand The Dude server and client installation
- Understand how to add the device into The Dude server
- Understand how to monitor the network devices
- Discovers any type or brand of device

Required Materials

Guests are advised to bring own Laptop and related peripherals (mouse, power adapter) as training material will be provided in soft copy
